Asia's Fastest Growing University

NAAC GRADE A+ ACCREDITED UNIVERSITY

Worksheet - 5

Student Name: Subhodeep Sarkar **UID: 26MCA20196**

Branch: MCA **Section/Group: 26MCA-3/B**

Semester: I **Date of Performance: 24/09/2026**

Subject Name: Web Programming Lab **Subject Code: 26CAP-605**

Course Outcome (CO)

CO3: Apply JavaScript programming concepts to create interactive web pages, handle user interactions, and perform client-side form validation.

Aim

(a) WAP to demonstrate dialog boxes in JavaScript.
(b) WAP to create form to submit user records and validate data.

Objectives

1. To understand the use of JavaScript dialog boxes.
2. To demonstrate `alert()`, `confirm()`, and `prompt()` dialog boxes.
3. To understand how JavaScript interacts with HTML elements.
4. To create a user registration form using HTML form elements.
5. To validate user input using JavaScript.
6. To display appropriate messages for valid and invalid input.

(a) WAP to Demonstrate Dialog Boxes in JavaScript

Steps of Experiment

1. Create an HTML document.
2. Add a heading and buttons for different dialog boxes.
3. Use the `alert()` method to display an alert message.
4. Use the `confirm()` method to ask the user for confirmation.
5. Use the `prompt()` method to accept input from the user.

6. Display the entered information on the webpage.
7. Save the file with `.html` extension.
8. Open the file in a web browser and test all three dialog boxes.

Source Code

```
<!DOCTYPE html>
<html>
<head>
<title>JavaScript Dialog Boxes</title>
<style>
body{
font-family:Arial;
text-align:center;
background:#f2f2f2;
padding:50px;
}
.container{
background:white;
width:500px;
margin:auto;
padding:30px;
border-radius:10px;
box-shadow:0 0 10px #aaa;
}
button{
padding:12px 20px;
margin:10px;
border:0;
border-radius:5px;
cursor:pointer;
}
</style>
</head>
<body>
<div class="container">
<h1>JavaScript Dialog Boxes</h1>
<button onclick="showAlert()">Alert Box</button>
<button onclick="showConfirm()">Confirm Box</button>
<button onclick="showPrompt()">Prompt Box</button>
<p id="result"></p>
</div>

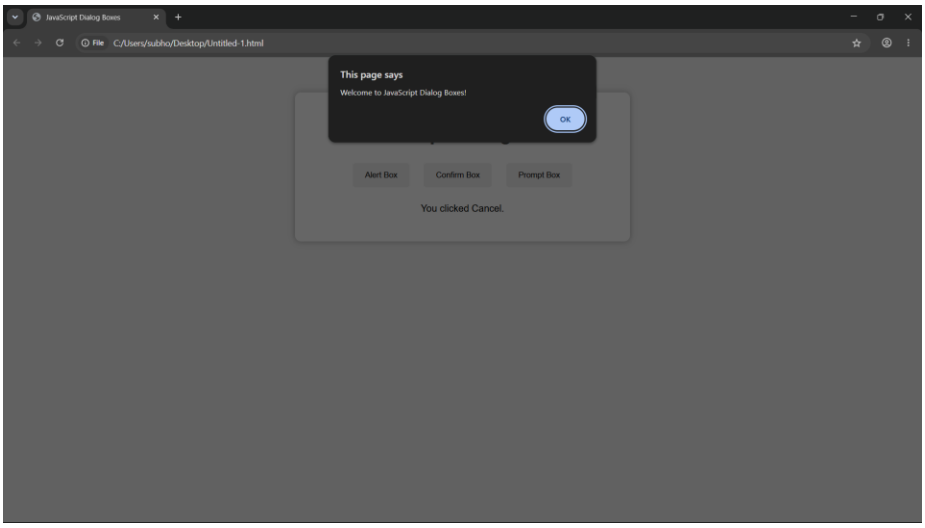

<script>
function showAlert(){
```

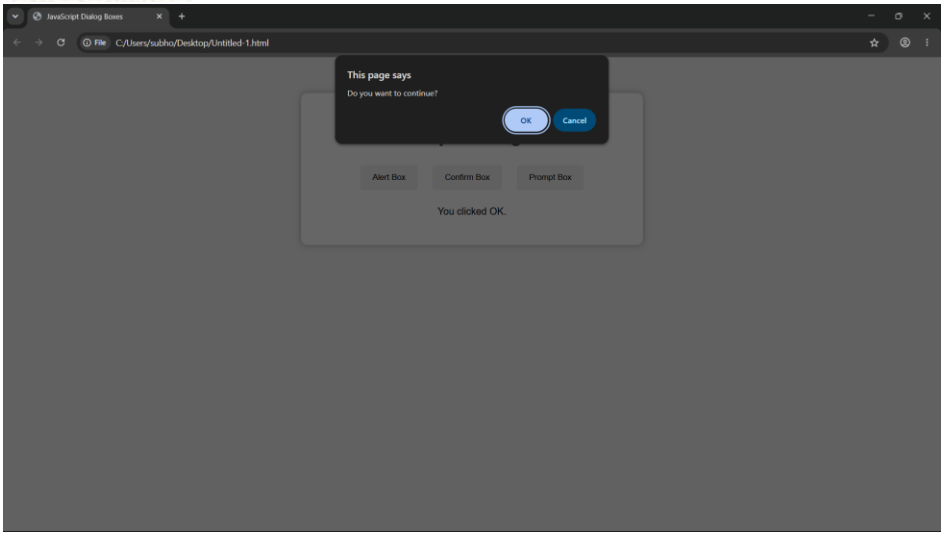

```
alert("Welcome to JavaScript Dialog Boxes!");
}

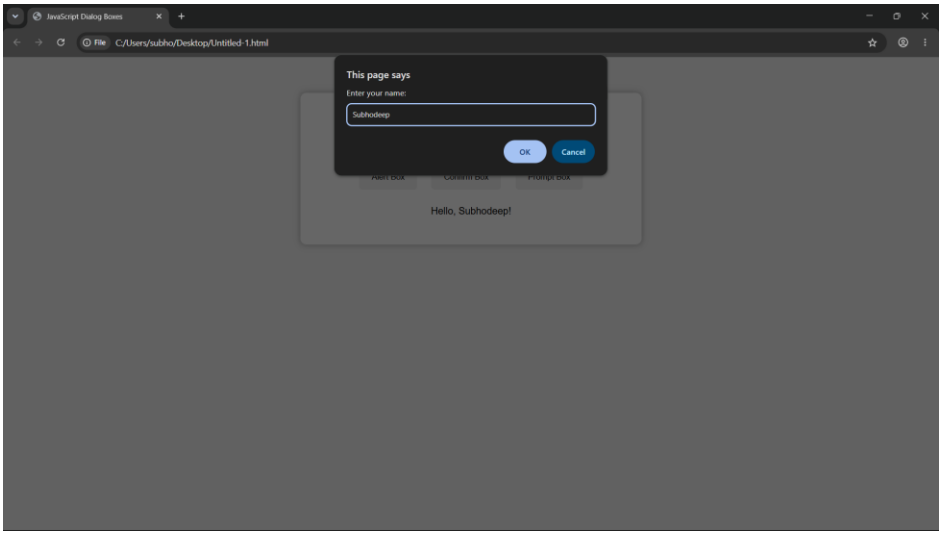

function showConfirm(){
let choice=confirm("Do you want to continue?");
document.getElementById("result").innerHTML=
choice?"You clicked OK.":"You clicked Cancel.";
}

function showPrompt(){
let name=prompt("Enter your name:");
if(name)
document.getElementById("result").innerHTML="Hello, "+name+"!";
else
document.getElementById("result").innerHTML="No name entered.";
}
</script>
</body>
</html>
```

Output

(b) WAP to Create Form to Submit User Records and Validate Data

Steps of Experiment

1. Create an HTML document containing a registration form.
2. Add fields for name, email, mobile number, password, age, and gender.
3. Add a submit button.
4. Use JavaScript to validate the entered information.
5. Check that required fields are not empty.
6. Validate the email using a regular expression.
7. Validate the mobile number and password.
8. Display an error message if the data is invalid.
9. Display a successful registration message when all information is valid.
10. Open the webpage in a browser and test the form with both valid and invalid data.

Source Code

```
<!DOCTYPE html>
<html>
<head>
<title>User Registration Form</title>
<style>
body{
font-family:Arial;
background:#f2f2f2;
padding:30px;
}
.container{
width:500px;
margin:auto;
background:white;
padding:30px;
border-radius:10px;
box-shadow:0 0 10px #aaa;
}
h1{text-align:center;}
input,select{
width:100%;
padding:10px;
margin:8px 0 15px;
box-sizing:border-box;
}
button{
width:100%;
padding:12px;
background:#333;
color:white;
border:0;
border-radius:5px;
cursor:pointer;
}
#message{
text-align:center;
margin-top:15px;
font-weight:bold;
}
</style>
</head>
<body>
<div class="container">
<h1>User Registration</h1>
```

```
<form onsubmit="return validateForm()">

<label>Name</label>
<input type="text" id="name">

<label>Email</label>
<input type="text" id="email">

<label>Mobile Number</label>
<input type="text" id="mobile">

<label>Age</label>
<input type="number" id="age">

<label>Gender</label>
<select id="gender">
<option value="">Select Gender</option>
<option>Male</option>
<option>Female</option>
<option>Other</option>
</select>

<label>Password</label>
<input type="password" id="password">

<button type="submit">Submit</button>
<p id="message"></p>
</form>
</div>

<script>
function validateForm(){
let name=document.getElementById("name").value.trim();
let email=document.getElementById("email").value.trim();
let mobile=document.getElementById("mobile").value.trim();
let age=document.getElementById("age").value;
let gender=document.getElementById("gender").value;
let password=document.getElementById("password").value;
let msg=document.getElementById("message");

if(name==""){
msg.innerHTML="Enter your name.";
return false;
}

if(!/^[A-Za-z ]+$/.test(name)){
```

```
msg.innerHTML="Name must contain only letters.";
return false;
}

if(!/^[^ ]+@[^ ]+\.[a-z]{2,3}$/.test(email)){
msg.innerHTML="Enter a valid email address.";
return false;
}

if(!/^[0-9]{10}$/.test(mobile)){
msg.innerHTML="Mobile number must contain 10 digits.";
return false;
}

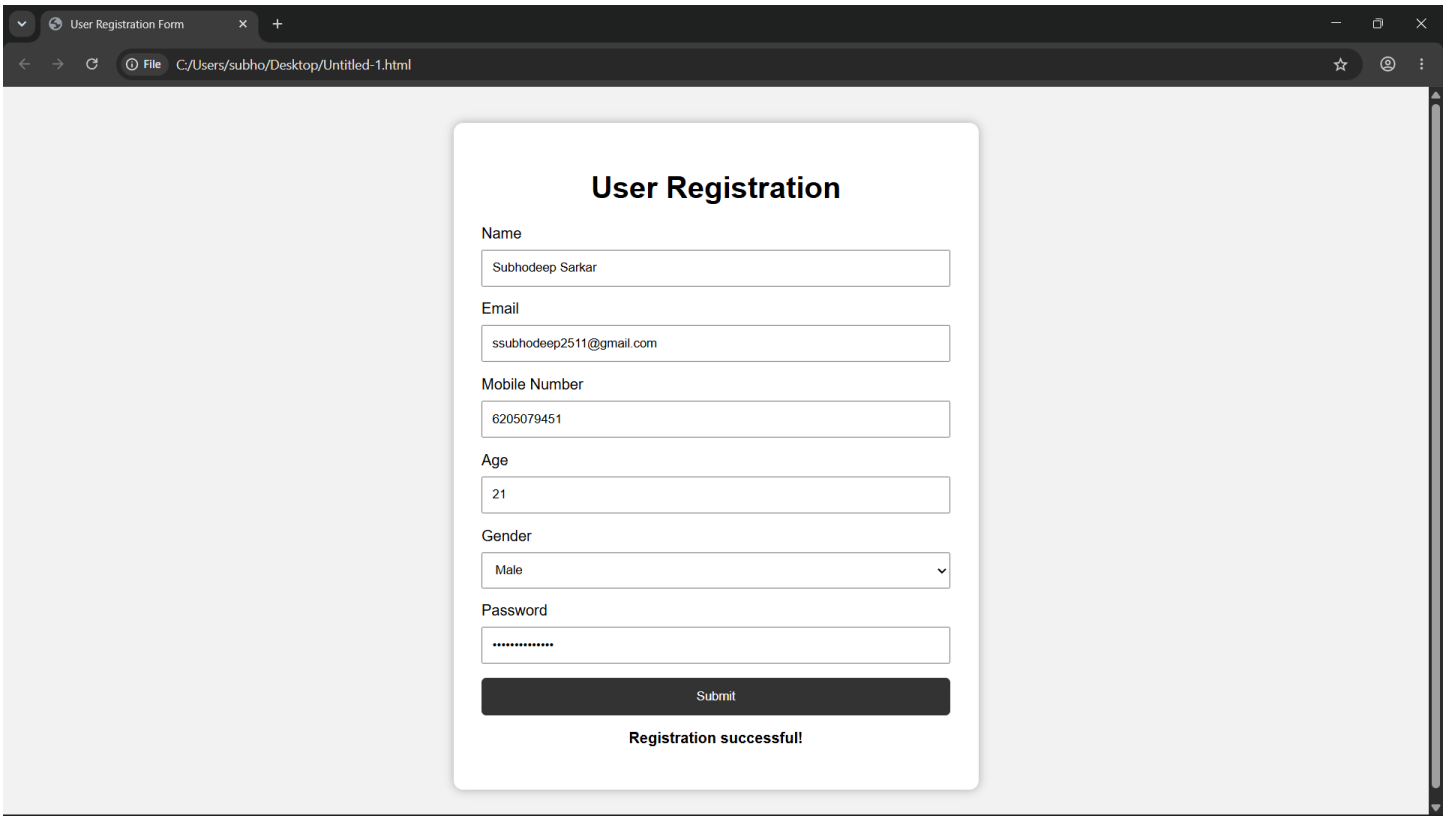

if(age<18 || age>100){
msg.innerHTML="Age must be between 18 and 100.";
return false;
}

if(gender==""){
msg.innerHTML="Select your gender.";
return false;
}

if(password.length<6){
msg.innerHTML="Password must contain at least 6 characters.";
return false;
}

msg.innerHTML="Registration successful!";
return false;
}
</script>
</body>
</html>
```

Output

Learning Outcomes

After completing this experiment, the student will be able to:

- Explain the purpose of JavaScript dialog boxes.
- Use alert(), confirm(), and prompt() in web applications.
- Handle user interaction using JavaScript.
- Create structured HTML forms for collecting user information.
- Use JavaScript to validate form data.
- Apply regular expressions for validating email, name, and mobile number.
- Display appropriate validation and success messages.
- Develop more interactive and user-friendly web pages using HTML, CSS, and JavaScript.

Evaluation Grid:
